

I have XM Radio in my car and I love it. I can listen to a myriad of stations from retro music to comedy. I just love it and it help me get through the day. I am getting it for my wife's car so she can enjoy it too. XM Radio is so versatile and enjoyable - everyone should have it.

I am a salesman and drive in my car "all day" and feel that the traffic and weather information is very useful because I need that information to just get through the day.

Also, I pay for this service and would cancel immediately if Broadcasters decided what I should hear.

It it ain't broke - don't fix it.
